Health Test Instructions

for blood collection by phlebotomist

Please read
all of these instructions
at least 4 days before
collecting blood samples

How It Works

SCAN ME

1. **At least 4 days in advance,** follow the preparation steps at healthieone.com/prepare.
2. **Follow the steps** before test day.
3. **Have your blood drawn** by the phlebotomy service of your choice. They will handle the return shipping too.
4. We will process your samples and **send you an email when your results are ready.**

Before test day: Important prep steps for you

Please perform these steps **before** blood sample collection.

SCAN ME

At least 4 days in advance, follow the preparation steps at **https://healthieone.com/prepare**.

Then, schedule a phlebotomy appointment (Mon-Wed only)

Independent phlebotomists across the country are available to collect samples for HealthieOne. Visit **healthieone.com/phlebotomy** to find phlebotomists near you.

Place both provided cold packs in a freezer for a minimum of **12 hours** prior to collecting blood.

Keep the clear elastic band.

Create your account and register your kit on HealthieOne.com anytime before blood collection: takes less than 10 minutes.

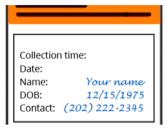

Ensure your blood collection day is Monday through Wednesday only and ensure that the day of and the day after collection are not holidays.

Fast for **at least 10 hours** overnight prior to collecting blood.

No food or beverage but drink water

Write your name, date of birth and contact info (phone or email) on the return sample bag label. Leave date and time blank.

At your phlebotomy appointment, **give all items in this kit to your phlebotomist**, including the frozen cold packs and these instructions.

Instructions for Phlebotomist on test day

Per our agreement with your organization, we request the following services:

1 **Blood Collection into TWO (2) tubes** - *provided*

One (1) **SST** (taller gold-top) tube

One (1) **EDTA** (lavender-top) tube

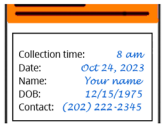

2 **Invert both tubes 10 times and wait for 30 minutes**

a. **Centrifuge the SST tube** at 1400 x g (RCF) for 10 minutes.

b. Insert the third (shorter gold-top) tube into the SST tube and **transfer the serum to the shorter tube by inversion.**

3 **Ship the samples the same day** using the FedEx prepaid envelope

A

Write your phlebotomy service name. Record collection date and time on the return sample bag label.

Place the shorter gold tube and lavender tube in the sample bag and press to seal. Leave absorbent pad inside the bag.

B

Place the sample bag containing the 2 tubes **alongside the frozen cold packs inside the Styrofoam box**, close box with its lid and secure lid with clear elastic band.

Insert the closed Styrofoam box into the **FedEx prepaid envelope** and seal it.

C

FedEx Office

Hand your package to a FedEx clerk at a **FedEx Office or FedEx Ship Center only** (**not** a FedEx OnSite or other FedEx drop-off point) **before their cutoff time.**

fedex.com

Last pickup time varies by location, so please check it for your location.

Note: tubes are **intentionally light suction** as we do not need much blood.
