Note:

- Claim the CPT codes for the analytes included in your final HealthieOne report.
- If you have any insurance other than CareFirst, use the unit price in the “CMS Fee Schedule” column.
- If you have CareFirst, use the unit price in the “CareFirst Fee” column where shown.
- Add up all the individual prices to get the total, then calculate your early adopter discount by subtracting the amount you paid.
For example, you paid \$500 for HealthieOne Complete, and the price per CMS for the analytes included in your final HealthieOne report (the sum of the table) is \$988.17. Your early adopter discount = \$988.17 - \$500 = \$488.17.
